Sri Saraswathy Musicals

What was asked, what was built, where to see it and how to check it

Covers phases 1 to 6. Status key: **Done** = built and tested; **Done*** = built, with a note to confirm; **Not built** = left out on purpose. Menu names are the admin sidebar names. Amounts are in rupees (Rs. / ₹).

1. The requested list, item by item

What was asked	Status	Where to see it	Quick check
Branch 3 (Ashok Nagar) — database and code	Done	Branch picker (top bar), Inventory → Add Product, Setup → Branches	Three branches are listed everywhere; stock boxes show three branches.
Branch selectable in Inquiry	Done	Inquiries (admin) and the storefront inquiry form	Create an inquiry for Ashok Nagar; it shows in the admin list with that branch.
Branch access can be given to users	Done	Setup → Users	Give a user only Porur; log in as them and confirm they see only Porur data.
Branch names above the GST number on the invoice	Done	Sales → Invoices → open an invoice	Branch names appear above the GSTIN.
"Subject to 'Chennai' jurisdiction only." under terms	Done	Any invoice, terms section	The line is printed under the terms.
Branch-wise invoice reference (e.g. INV-2026-P0001, 0002)	Done	Invoice header, "Invoice No"	Each branch counts on its own. Now 4 digits; Porur code is P.
Tax invoice number unchanged (SSM/2026-27/0021), across all branches	Done	Invoice header	SSM numbers go up one by one across all branches.
Quotation tab, replacing the estimate	Done*	Sales → Quotations	Create, print, copy link, WhatsApp. Built without the sample file, which has not been received.
Quotation terms: valid 30 days, price may change, advance needed	Done	Quotation sheet	The three terms are printed on the sheet.
GST editable instead of fixed	Done	Invoice editor; service ticket page	Change a rate, save; totals and tax split change.
Products bought during a service appear on the invoice, service cost adjusted	Done*	Sales → Service / Repairs → open a ticket → "Products sold with this service"; then View Invoice	Add a product; invoice shows service line + product line; stock drops. Confirm with the client that products are added *on top of* the service charge.
Advance paid is reflected in revenue	Done	Reports → Sales Analytics (Service Net Sales)	A repair with an advance counts it on the day received; no double count when the repair is finished.
Add Product inside Purchase	Not built	(Existing) Inventory → Add Product	Left out because admins can already add a product from Inventory.
GST auto-calculated, same dropdown as sales	Done	Procurement → Purchases	10 × Rs.1,180 at 18% (prices incl. GST) gives goods 10,000 + GST 1,800 = 11,800.
Partial payment to a chosen branch, like inventory allocation	Done	Purchases → "Amount Paid Now" → "Which branch pays it"	One box per receiving branch; change one and the other adjusts to keep the total.
Purchase invoices editable, like sales invoices	Done	Procurement → Purchase Invoices → Edit (admin)	Change a cost or GST %; totals recalculate. Quantity and product are locked.
Keep "update selling price" checkbox, remove the wording	Done	Purchases, on each product line	Checkbox is there with a short label only.
Recent purchases in a separate tab	Done	Procurement → Purchase Invoices	All bills listed in their own page.
Date and branch filters on sales and purchase invoice tabs	Done	Sales → Invoices; Procurement → Purchase Invoices	Filter by dates and branch; the totals follow the filter.

What was asked	Status	Where to see it	Quick check
Outstanding payments against an invoice, not the vendor	**Done**	Procurement → Vendor Outstandings → View a vendor	Unpaid bills each have a Pay button; a Pay vendor button spreads one amount over the oldest bills.
Opening balance for vendor outstanding	**Done**	Vendor panel → "+ Opening balance"; Purchase Invoices → "Opening balance"	Add Rs.10,000 owed by Porur; it appears as a bill that can be paid.
Opening balance for products	**Done**	Inventory → Add Product	Enter stock per branch; no vendor bill is created.
Product dropdown with stock per variant	**Done**	Storefront product page; Purchases; Stock Transfers	Options read like "22 Inch — 12 in stock" or "Only 2 left".
Separate photo for each variant	**Done***	Inventory → Edit Product → Photo column; storefront product page	Upload a photo per variant; picking that variant shows its photo. Please check the photo switch on screen.
Net sales in analytics	**Done**	Reports → Sales Analytics	"Net Sales" cards, with a line showing billed total − delivery − GST = Net Sales.
Sales report includes customer details	**Done**	Sales Analytics → Sales Report tab	Name, phone and GSTIN per bill; also in the CSV export.
GSTR-1 report uses the Vadapalani address	**Done**	Reports → GST & Tax	Business address at the top is Vadapalani's.

2. Extra changes made along the way

- **Porur invoice code** changed from 1MH to **P** (editable on Setup → Branches). Old invoices keep their old numbers; new ones start at INV-2026-P0001.
- **References are now 4 digits** (INV-2026-P0001, QT-2026-P0001), allowing up to 9,999 per branch per year. Older 3-digit numbers stay as they were.
- **Pay vendor**: one amount is spread over the oldest unpaid bills, with a table showing which bill and which branch pays *before* you save. Each branch is charged only what it still owes on a bill.
- **"Prices include GST" checkbox** on purchases (ticked by default) and on the purchase edit dialog. Costs are always stored before GST.
- **Old vendor payments with no bill** appear in a "Payments not against a bill" box, with an Apply to bills button (admin).
- **Help box** on Vendor Outstandings ("How this works").
- **Quality tooling**: `npm run lint` works again (Next 16 removed the old command). Results: 0 lint errors, 198 automated tests passing, build succeeds.

3. Suggested order for a tester

#	Area	What to do
1	**Branches and access**	Open the branch picker and Setup → Users. Give a test user one branch and check they see only that branch.
2	**Invoices**	Open an invoice: branch names above GSTIN, Chennai jurisdiction line, reference like INV-2026-P0001, tax number SSM/…. Edit GST on it.
3	**Quotation**	Sales → Quotations → New. Save, copy the link, open it in a private window, print, send on WhatsApp.
4	**Purchase with GST**	Procurement → Purchases. Add a line (qty 10, Rs.1,180, 18%) with "Prices include GST" ticked: goods 10,000, GST 1,800, total 11,800. Tick Inter-state: it becomes IGST.
5	**Branch payment**	Buy 9 units, 6 to Vadapalani and 3 to Porur. Pay Rs.6,000 from Vadapalani only. In Purchase Invoices expand the bill: it says "Paid at purchase … Vadapalani".
6	**Purchase invoices**	Use the date and branch filters; Edit a bill (admin); export the CSV.
7	**Opening balance and paying**	Vendor Outstandings → View → + Opening balance (Rs.10,000, Porur). Pay Rs.4,000; balance becomes Rs.6,000. Try Pay vendor with two bills.
8	**Service products**	Service / Repairs → a ticket → add a product → View Invoice shows two lines; stock goes down; removing the product puts it back.
9	**Analytics**	Sales Analytics → Net Sales line adds up; a repair with an advance counts it; Sales Report shows customer details.

#	Area	What to do
10	**Variants**	Edit Product: add a photo to a variant. On the storefront choose that variant and confirm the photo changes and the dropdown shows stock.

4. Open items

- **Quotation sample file** has not been supplied; the layout was built without it and can be matched when it arrives.
- **Service products**: confirm with the client that products are added on top of the service charge (not taken out of it).
- **Branch codes**: Porur is P. Vadapalani (V) and Ashok Nagar (A) are working guesses; change them on Setup → Branches if different.
- **No delete/undo for a vendor payment** on screen yet; this can be added as an admin-only action.
- **Not yet seen working on screen** (built and covered by tests, please look at them first): the "Prices include GST" checkbox on purchases, the variant photo upload and storefront photo switch, and the stock numbers in the Purchases and Stock Transfers dropdowns.

A longer version with the code locations is in docs/CHANGES-AND-TEST-GUIDE.md.
